monthly

IBI-EDBB Grad Student Mini-Symposium

Friday – December 7, 2018 – 17h00
EPFL – room SV1717

“KAP1 is an Antiparallel Dimer with Functional Asymmetry”
Giulia Fonti
Dal Deraro Lab (Laboratory for Biomolecular Modeling - LBM)

“Engineering Bioinspired Materials for 3D Organoid Culture”
Delphine Blondel
Lutolf Lab (Laboratory of Stem Cell Bioengineering - LSCB)

session chair: Zander Harteveld (Correia Lab - LPDI)
organizing faculty: Prof. Bruno Correia & Prof. Matteo Dal Peraro

Followed by a friendly get-together around pizza & beer, sponsored by the IBI

→ Next IBI-EDBB Mini-Symposium: January 11, 2019, 17h00 (calendar: https://bioengineering.epfl.ch/PhD_Minisym)
→ See current Bioengineering seminar/event calendar at https://bioengineering.epfl.ch/seminars
